## SARA LOVELL

Furry alligator puppies, ducks on parade, preaching penguins and flying children are just a few of the wonders you'll encounter in Sara Lovell's fanciful worlds. With three full-length albums of songs for kids and families, it's apparent that Sara is not so much singing to children as she is reporting back with love from a magical landscape she inhabits.

Whether she is vividly painting an alternate universe or simply describing everyday moments in life, Sara's authenticity never talks down to children, instead, it invites both kids and their parents to dream and play along with her. The lyrics move easily between whimsical and matter-of-fact, and are set to music that is at once sophisticated and immediately accessible.

Winner of several prestigious awards (including a Parents' Choice® Gold Award and two Independent Music Awards) Lovell also has three critically praised "grown-up" CDs to her credit. She lives in Berkeley with her 10-year-old son who loves to paint his face and dance in front of the mirror. After a long day of child wrangling, Sara is thrilled when she has enough brain cells left to compose a tune and follow whatever lyric journey her imagination decides to take her on.

*"Magic happens in this CD.... with imagination and stirring flights of fancy that are by turns comical, suspenseful and lullaby dreamy."*
